

Main use case:

- Visit website
- View song clues (lyric sample, genre, decade)
- Submit a text guess for title and for artist
- View the correct answer

Secondary use case:

- View yesterday's puzzle (not playable)
  - Lyric, title, artist

Future use case:

- Store user's previous performance
- Check if the submitted answer is correct

Question for client: will a song (title or lyric) ever be repeated?

Future expansion: add a grading bundle to a puzzle (a regex for the lyric clue)

Object relations:
